

house of 1,400 sq m to be reformed within the Alfalfa Quarter in Seville's center of town

Seville, Center, ID: 410638 | Sale: 2.000.000€

Description

This is a house of 1,400 sq m to be reformed within the Alfalfa Quarter in Seville's center of town. This house is big. It has about 1,425 sq m built on a plot of almost 600 m2 . It is one registered property and is in the heart of Seville, next to La Alfalfa.

The house has had various uses over time and is quite "unconfigured" but has great potential to replan whole again and make several floors or even more apartments. Given its location, no doubt, it will be a star product in an area where there is little supply of new homes.

The size of the plot and sq m built next to the area where it is located, make the transformation of the house has great potential.
