Description

Stunning home with a large façade of about 23 linear meters made of brick and with the 60s aesthetic .

It has a large garage and an entrance with a nice wooden gate topped with star-shaped nails . It is in the center of Cordoba , next to Plaza de Colón.

This is a very large house , divided into three floors: the ground floor is 485 sqm with a nice entrance hall that gives access to a large patio with pink portico columns.

Surrounding the courtyard we find a number of rooms, on the ground floor there is also a large garden paved with stone pebbles forming motifs, there is also a nice pool floored with clay slabs.

We access the first 451 sqm floor through a stair with a large window at the top made by Povedano . On this floor we find a large main hall that leads to a sitting room , the dining room and living room (all three of them with fireplace!) . It also leads to a covered terrace , kitchen , office , pantry and service area . There are three large bedrooms (with three beds each), a normal bedroom, master room, three bathrooms and a toilet. All bedrooms have fitted wardrobes.

On the top floor of about 242 sqm in there is a reading room , a play room, files , storage , balcony , laundry room and walk on roof (buildable according to the City’s Building Plan in Córdoba).

In short, we have a large house, of unusual proportions , with many square meters available and the possibility of further building vertically.

A great opportunity in the heart of Córdoba ! .
