Description

Large and compact thoroughly thought villa built by its current owner decided to build a house with the best finishes of the time.

It has three floors: a vast garage of 300 sqm, on the ground floor there are the sitting rooms, kitchen and dining room and the bedrooms are on the first floor.

The house is 496 sqm of plus an extra 45 sqm porches that together with the garage total 752 sqm

The house is very well finished. Every detail has been supervised by the owner who is a perfectionist, for example, the first floor is the floor with polished granite slab that that has been layed to look as if it were made of one piece!

Outside there is a solar-heated pool with a retractable roof that allows you to swimm all year round.

Most of the apliances, kitchens, fireplaces, an elevator in the house and many of its rooms are semi new because they've had very little use.

A great home for those lucky enough to enjoy it!
