A preciously restored house with great detail in the center of Seville

Seville, Historic Center of Town, **Sale: 1.495.000€**

Description

This house is surprising for the good taste with which it has been restored and for the attention to the smallest details. Here everything is thought: the tiles in the floors, the ancient doors perfectly restored and adapted, the coffered beams, the enclosures … nothing has happened by chance, everything is millimetrically thought out, including the interior decoration of the elevator box, to match the rest of the house!

It is accessed through a beautiful restored old gate and a hall with fence. From there, a large distributor that gives access to the guest bedroom, garage and elevator. In the background has a patio of lights.

On the top floor, living room, dining room and kitchen. Above, the bedrooms and on the deck a pool with a pleasant terrace overlooking Seville.

It is a compact house, well decorated, well restored. In short, a very cozy house!

It has natural gas heating and air conditioning.

Note: to be sold without furniture.
